About SigmaQ Analytics

SigmaQ Analytics is an independent specialist lab focused on topics in the area of Quantitative Analysis/Risk Management and Data Science. Our team combines deep analytical expertise with long-term industry experience.

As a competent and reliable partner sigmaQ professionals work side by side with their clients. We follow a goal-oriented and entrepreneurial approach.

We believe that an excellent team is key to success. Our team unites talented people from diverse backgrounds and cultures, who share a common desire to learn and apply their knowledge to solve real world problems.

We are always looking for truly entrepreneurial employees, eager to never stop learning and be part of a dedicated team.

About the Role

The role will be to further SigmaQ's CreditSuite as a cutting edge software suite in the space of credit risk management. You will be responsible for the entire code base and work closely with our modelling and data engineering department.

- Further develop SigmaQ's CreditSuite software package
- Translate UI/UX designs from Figma into actual Python code
- Collaborating with the modelling and the data engineering department
- Maintaining the code base

About You

- 3+ years industry experience in a similar role
- Experience with software packages like Figma, Python Jupyter notebooks, Kafka and React
- The ability to effectively collaborate with a broad range of people and roles
- Data analytics experience (data analysis packages, R and Python knowledge)
- Truly entrepreneurial work approach

What we offer

- You will work with an international and dedicated team
- We are hands-on with a will to deliver exceptional quality
- You choose your workplace
- Extremely flexible working hours
- Fun and leisure activities
